Change Telephone Numbers

Touch ⚙ Select "Dialling from the menu. Enter a valid master code.

The screen will display any existing telephone numbers. To edit touch the number 1, 2 or 3. A keypad will appear allowing entry of the new number. The bin symbol may be used to delete unwanted numbers.

Touchpad

Touch ⚙ Select "Touchpad" from the menu. The sub menu will display.

1.	**Clean**	=	Selecting this will present the user with a 10 second countdown clock which disables the touchscreen to allow cleaning.
2.	**Auto Brightness Adj.**	=	When YES is selected the display brightness will automatically adjust to suit the light level in the room.
3.	**Brightness**	=	Display brightness adjustment to suit room lighting. If auto brightness (above) is selected, operation of this control allows the Touch Classic to learn the users brightness preference.
4.	**Key Click**	=	Volume adjustment of the touch CLICK sound.
5.	**Sound**	=	Adjust the tone and volume of indications.
6.	**Identification**	=	Displays the current firmware version
7.	**Security**	=	Allows changes to the Touch Classic security settings through the following options.
•	Scramble Pinpad.	=	This option alters the standard keypad to display the numbers in random patterns to remove the possibility of a code being revealed by finger marks on the touchscreen.
•	Hide Pin	=	With this option NO. The pin is displayed in the four boxes on the keypad screen when entering a pin. With option YES the pin is not revealed.
•	Protect Settings	=	Selecting YES will force the user to enter a valid master code for access to any of the above menu.
